

## COMPANY PROFILE

The Pressure Positive Company has been manufacturing deep muscle self care tools since 1979. Our

*Workshops and Offices*

commitment to personal health and well being through non invasive muscle therapies guides us to design well crafted, simple devices that continue to set the industry standard. Praised by both patients and health care professionals for their easy-to-use, proven design, our muscle therapy tools help extend professional therapy into ongoing, practical self care with positive results.

## SELF CARE

*anywhere you are:*

- Home
- Office
- Clinic
- Classroom
- Gym
- Travel
- Field

Whether you are a professional relieving your own stress and overuse symptoms, a patient rehabilitating through injury or an athlete looking for the extra edge on performance, Pressure Positive massage tools are an effective, practical way to temporarily manage muscle tension and myofascial pain due to trigger points whenever and wherever you need it.

## TESTIMONIALS

"Hello, I am writing to let you know how much I love your product. I was given a Backnobber II by our PT after an injury and now find myself using it every day. In Iraq we have very few comforts of home so being able to rub knots out of my back by myself is a huge morale booster. Thanks again for a great product!"

– Sgt David T., Iraq

"...I am a Massage Therapist and am working through some overuse issues with my arm and hand. My PT recommended the Jacknobber II and Indexknobber II to save my CMC joint. I just bought several of the different tools to try using in my practice for deep trigger point and myofascial release work, and for my own self care. Thanks for making great tools — your company is the only one I trust and recommend to my patients/colleagues."

– Haley M., LMP
